Notes from the course *Competencias digitales: conocimientos, habilidades y actitudes para la Sociedad Red* (Digital competences: Knowledge, skills and attitudes for the Network Society), organized by the CUIMPB, and held in Barcelona, Spain, on July 16th and 17th, 2009.

More notes on this event: competencias_digitales_culimpb_2009.

**Participatory Media and Participatory Pedagogy**

**Howard Rheingold**

It's better to talk about literacy (or literacies) than skills, are skills are bound to the individual, and literacies have a social component: skill + community. There's a social component to knowledge tied to the new media we're witnessing.

For instance, we can buy a book online, but the fact that you can not only access the "objective" information that it's online about the book, but also the opinions of others, this enriches the information. And the consumer more and more needs a context, a frame. And this frame heavily relies on reputation.

Thus, education also needs a context, a frame. Again — and especially in education — it is about reputation, and about the social factor.

The Promise and Contradictions of E-Democracy, Obama Style

**Micah L. Sifry, Personal Democracy Forum**

Expectations that the Obama administration would continue the tone of the Obama campaign: lowering barriers to participation, opening the government, etc. But it does not seem that expectations have been accomplished.

The Campaign

The open government directive was the first one to be issued when entering the White House. It claimed for a more open, more participative, more collaborative.

Empowerment and Governance in the Information Society (II): digerati, governorati and the role of ICT4D

By Ismael Peña-López, 24 January 2011
Main categories: e-Government, e-Administration, Politics, ICT4D, Information Society, Participation, Engagement, Use, Activism
Other tags: governor, digerati
3 Comments » | Edit | 3682

In *Empowerment and Governance in the Information Society (I)*: the hourglass of information power we described a way to look at power, empowerment and governance, and ended up facing an odd distribution of power in the Information Society. A close up to that distribution may look like the following image:

![Distribution of power in the Information Society](http://ictlogy.net/?p=3682)

**Can change the system**

- Supranational Econ. Elites
- Supranat. non-Govt. Orgs.
- Supranat. Govt. Orgs.
- Government
- National Partiality
- Governorati / Digerati
- Regions / States
- Cities
- Individual

**Democracy Gap?**

**Who are them?**

**Can act freely within the system**
Democracy and the power of the individual (I): a position paper

By Ismael Peña-López, 04 February 2011
Main categories: e-Government, e-Administration, Politics, Meetings, Participation, Engagement, Use, Activism
Other tags: ditchley
No Comments » | Edit | 3695

The Ditchley Foundation has invited me to take part in one of their conferences under the general topic of Democracy and the Power of the Individual, taking place in Ditchley Part, 3-5 February 2011. The aim of the conference is that the participants debate around the impact of Information and Communication Technologies onto democracy and democratic forms of participation and engagement, including governance. There will be three main discussion lines:

- **Democracy and social change**, dealing about democratic systems and the ongoing social changes in the Information Society, engagement, how and why people participate, etc.

- **The health of institutions**, that is, whether institutions are of any value nowadays, how should they be changed or how should day accommodate to the pace of new forms of participation. What is the role of governments and political
Democracy and the power of the individual (II): afterthoughts

By Ismael Peña-López, 21 February 2011

No Comments » | Edit | 3703

Last 3-5 February 2011 I attended the conference Democracy and the Power of the Individual, organized by the Ditchley Foundation.

John Holmes, the Director of the Foundation, has published his traditional note on the conference. The note is not only worth reading as an approximate summary of what was discussed during the sessions, but especially as a good state-of-the-question list of the most relevant topics concerning democracy, politics, governance and citizenry. I honestly think that the paper definitely is a good starting point or a faithful snapshot of what is going on in the intersection of the Information Society and Politics in a very broad sense.

This paper is the latest, improved and merged version of two previous lines of work. On the one hand, a reflection on e-Readiness, digital literacy and its role in participation, which I presented at the 4th International Conference on eDemocracy 2010 (EDem10) in Krems last year. On the other hand, the reflections on how the distance between governance and empowerment has been increasing due to Information and Communication Technologies (Empowerment and Governance in the Information Society (I): the hourglass of information power, Empowerment and Governance in the Information Society (II): digerati, goverati and the role of ICT4D) and which later became my position paper for the Democracy and the power of the individual conference at the Ditchley Foundation.

Empowerment and Governance in the Information Society (II): digerati, goverati and the role of ICT4D

20110124

By Ismael Peña-López
Main categories: e-Government, e-Administration, Politics | ICT4D | Information Society | Participation, Engagement, Use, Activism
Other tags: goverati
[comments: 3]

This is a two-part article on the power relationships and distribution in the Information Society. It first presents, in Empowerment and Governance in the Information Society (I): the hourglass of information power, some concepts as power, empowerment and governance, and how they have been distributed amongst citizens and institutions along ages. The second one, Empowerment and Governance in the Information Society (II): digerati, goverati and the role of ICT4D, reflects on how the quality of democracy is decreasing precisely because of an increase of citizen empowerment.

In Empowerment and Governance in the Information Society (I): the hourglass of information power we described a way to look at power, empowerment and governance, and ended up facing an odd distribution of power in the Information Society. A close up to that distribution may look like the following image:

![Distribution of power in the Information Society](image-url)

Analyzing digital literacy with a single simple tweet

By Ismael Peña-López
Main categories: Digital Literacy
[comments: 7]

Two years ago, in *Towards a comprehensive definition of digital skills*, I depicted digital literacy according to five different categories, being those categories technological literacy, informational literacy, media literacy, digital presence and e-awareness (please see the paper *From laptops to competences: bridging the digital divide in higher education* for a thorough explanation about those concepts):

![Towards a comprehensive definition of digital skills](image)

If you need to cite this article in a formal way (i.e. for bibliographical purposes) I dare suggest:
